Abstract

The main objective of this article is to analyse how research management is carried out in some higher education institutions in Paraguay, based on the analysis of good practices analysis developed. It also analyses the virtual accessibility of how the information and the communication in research and science is carried out. Accessibility to digital information of the institutional Web contents of these institutions and their research units are analysed in order to understand if they comply with the accessibility requirements of the Accessibility

Guidelines for Web Content WCAG 2.0 (Web Content Accessibility Guidelines 2.0), of the World Wide Web Consortium (W3C), as stated in the Directive (EU) 2016/2102 of the European Parliament and the European Standard EN 17,161:2019. The final analysis revealed several weaknesses affecting users' interest and motivations.
